

RIVA Engineering Scholarship - Build the Future

Call for applications for the winter semester 2026/2027

About RIVA GmbH Engineering

Riva Engineering stands for German engineering excellence at the highest level. As a specialized engineering company, we develop, design, and build technically complex large-scale structures, iconic buildings, and sophisticated facade systems. Our mission is to transform architectural visions into built reality—with precision, innovation, and the utmost attention to every detail. Our projects shape skylines, create identity, and set technological standards. These include, among others, the Grand Tower in Frankfurt, the Clock Tower in Mecca, as well as significant construction phases around the Kaaba and the Grand Mosque. Particularly in the Arab world, we have established ourselves as a reliable partner for high-end projects where technological excellence, cultural sensitivity, and collaborative partnership are crucial.

We deliver solutions that go far beyond the norm. Whether highly complex facades, movable structures, sophisticated metal and glass elements, or one-of-a-kind custom solutions: Riva Engineering masters complexity where others see limits. Our work combines technical precision with design excellence and international project experience. In doing so, we adhere to clear values: pushing technological boundaries, uncompromising precision, responsibility on a grand scale, cultural understanding, long-term partnerships, and mastery of complex tasks. This approach shapes not only our projects but also our understanding of collaboration, fostering the next generation, and shaping the future.

Through our scholarship program, we aim to support young talents who demonstrate technical excellence, curiosity, and a creative spirit. After all, extraordinary structures are created by people who think big, take responsibility, and are willing to continually redefine what is possible.

Riva Engineering is therefore offering **two scholarships** for the **2026–2027 winter semester**.

Amount and duration of the scholarship

The scholarship amounts to €300 per month.

Funding will begin on September 1, 2026, and will initially be granted for two semesters.

Application period

Applications for the scholarship will be accepted from **June 1, 2026, to June 30, 2026.**

Applications will not be considered in the selection process if:

- received before the start or after the end of the deadline
- contain incomplete documents

Application requirements

- Enrollment in one of the following bachelor's degree programs:
 - Business Administration, part-time
 - Applied Computer Science
 - Electrical Engineering
 - Management and Human Resources
 - Automation Technology and Mechatronics
- You are at least in your **2nd semester** of the bachelor's program during the 2026/2027 winter semester

Possible further agreements

In addition to financial support, Riva Engineering offers the following additional options:

- Employment for internships and working student positions
- Preparation of final thesis
- Potential opportunity to join the company upon successful completion of your degree

These offers are voluntary on the part of the company. The company is therefore under no obligation to offer them.

Application documents

To apply for the scholarship, please submit the following application documents by email to the scholarship office at Heilbronn University (stipendienstelle@hs-heilbronn.de) between **June 1, 2026, and June 30, 2026**:

- Completed and signed [application agreement](#)
- Letter of motivation (max. one DIN A4 page)
- Tabular curriculum vitae
- current, complete transcript of records
- Certificate of enrollment for the winter semester 2026/2027 (if not yet available, then for the summer semester 2026)
- If available, certificates from relevant internships, vocational training, professional activities, etc.

If the application documents are not written in German or English, an officially certified translation into German must be included.

Application process

- First, please fill out the application agreement and submit it with all other required documents in **one PDF file** by e-mail to **stipendienstelle@hs-heilbronn.de**.
- If you are shortlisted, you will be invited to a personal interview with the company.
- You are expected to be informed of an invitation to interview in mid-July 2026.
- The interviews themselves will then take place by arrangement in July/August 2026. Please make a note of this period in advance.

All applicants will be notified in writing of the outcome of their application. Please refrain from inquiring about the status of your application.

If you have any questions, please contact the scholarship office.

We wish you every success!
